

Montreal, December 1st, 2016
Press Release

Sono Video Inc., a leader in the Canadian audiovisual industry, is proud to announce that it has entered into a joint venture with CEV and their audiovisual division.

Sono Video and CEV are pioneers in the field of professional audiovisual in Quebec with more than forty years' experience each. This integration, organized by Sono Video, allows the company to consolidate and expand its' presence in Quebec and to better respond to our shared customers' needs. This transaction includes the integration of the two company's personnel into one entity.

Sono Video had taken a step forward in 2015 with the integration of its' operations with Audability, bringing the combined portfolio of products and services to a national market. The integration of CEV's audiovisual division allows it to further broaden its' market and become one of the largest audiovisual companies in Canada.

Business

Founded in 1976, Sono Video serves the entire province of Quebec through its offices in Montreal and Quebec City. We specialize in the development and implementation of audio-video and audiovisual projects of all kinds. We handle every aspect of imaging, whether it's videoconferencing, image capture, interrogation rooms, multimedia screening, dynamic displays, medical imaging or automation, without neglecting the different aspects of audio for these technologies.

5915, Airport road, suite 700, Mississauga (Ontario) L4V 1T1

Technical team

Sono Video has a team of technical experts who have degrees in electronics and computer science. Thanks to our sales department and the 200 recognizable brands that we distribute, our technicians receive continuous training on the newest technologies. These courses are taught by specialists from major manufacturers whose reputation and knowledge are internationally recognized.

Related services

Over the years, Sono Video has expanded its services to include consulting, integration, programming, equipment repair, rentals and maintenance contracts for better after-sales service; all of this with the aim of offering a complete solution to its customers. Moreover, in order to reduce the downtime of systems and equipment installed for its customers', Sono Video offers expertise in a professional manner for external and internal technical resources to quickly respond to your needs. We guarantee confidentiality for all your projects.
